

PROJECT 02

Elleci Lab is the space where new solutions come to life.
In Elleci Lab we imagine and create today what will be
indispensable tomorrow.

DIALOGO

———— ■ 01

DIALOGO is the modular program that allows maximum interaction between elements in the kitchen.

The Elleci design expression takes shape in the new DIALOGO project, where functionality and structural details define new standards. Its rational aesthetic expresses even more elegance, style, and ease of use.

INTRODUCTION

ELLECI

WORKSTATION
AND EQUIPPED TRACK
INSTALLABLE IN CABINET
DEEP MORE THAN
750 MM

Dialogo 360 Workstation in Black K86
Dialogo C86 Equipped Track in Black K86
Mixer Solo in Black Matt

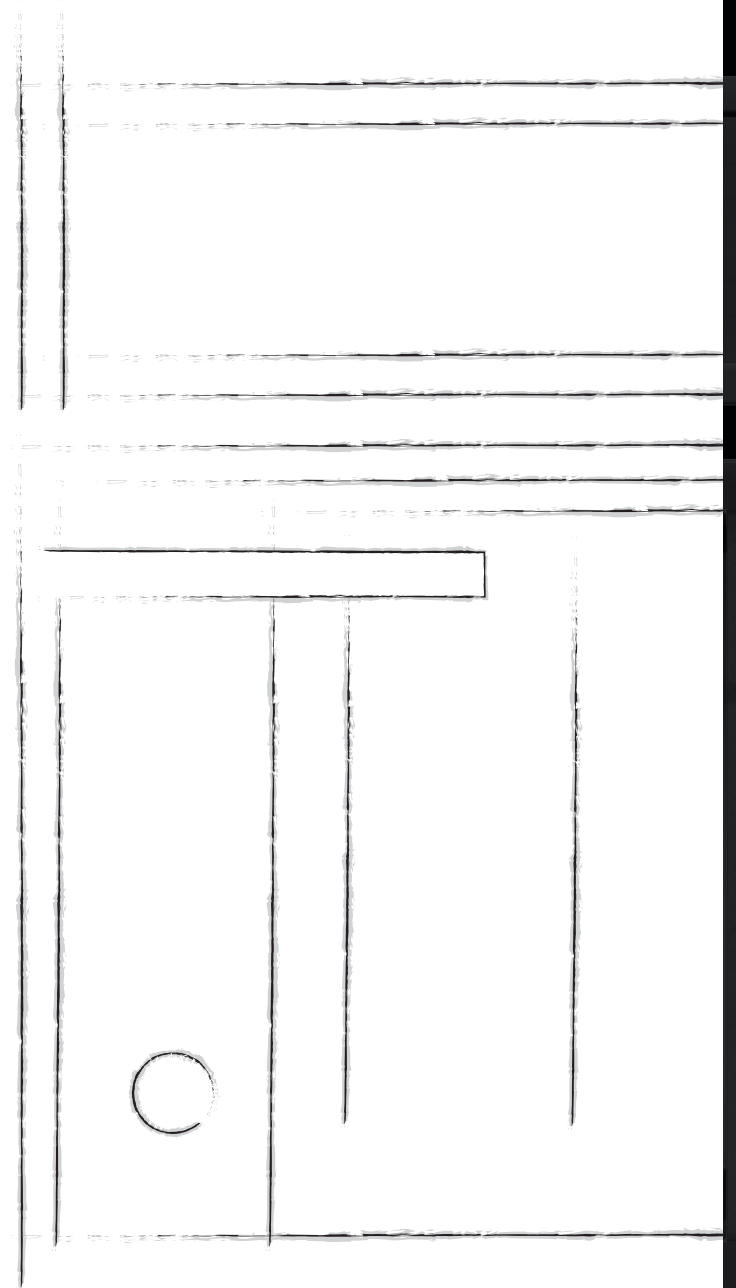

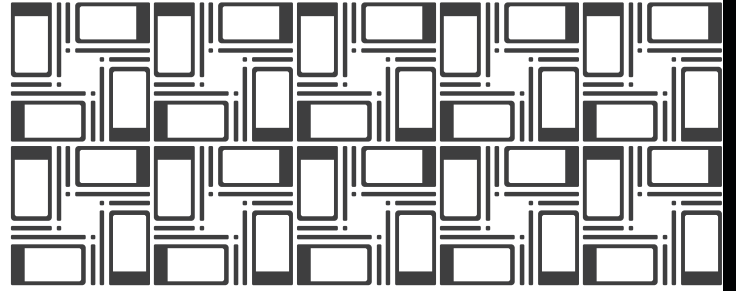

Element Kit 2 Cutting Boards in Aluminium Black Matt
Element Tray in Aluminium Black Matt
Element Colander Dialogo in Polypropylene Black Matt

02

A new experience in the kitchen is about to begin, moments and spaces in which everything is exactly as it should be. DIALOGO allows to have everything at hand, thus improving the ergonomics while preparing food.

ERGONOMICS

Workstation

A **workstation**, the oversized main tank, with increased inclination floor for better water flow.

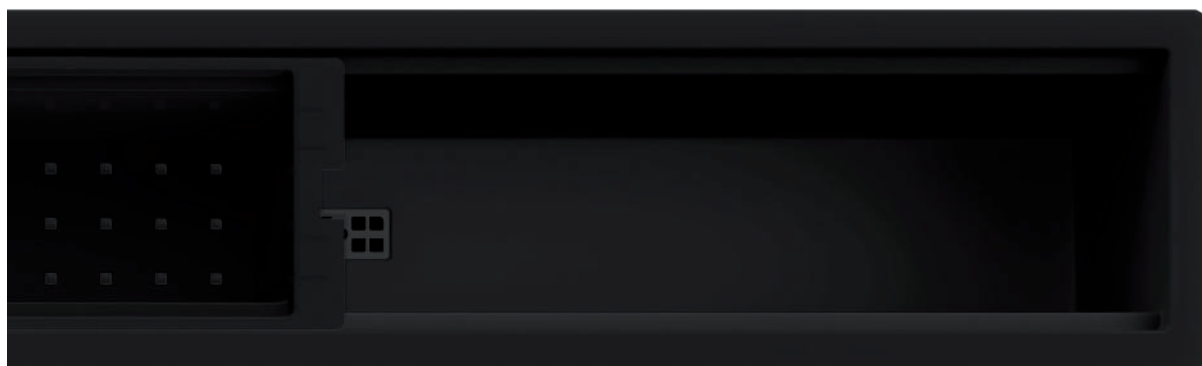

An **equipped track**, the first in composite, to place utensils thus increasing easiness of use in the kitchen.

A series of **accessories** (in aluminium silicon, alimentary polypropylene) designed to have at hand everything you need during the food preparation phase.

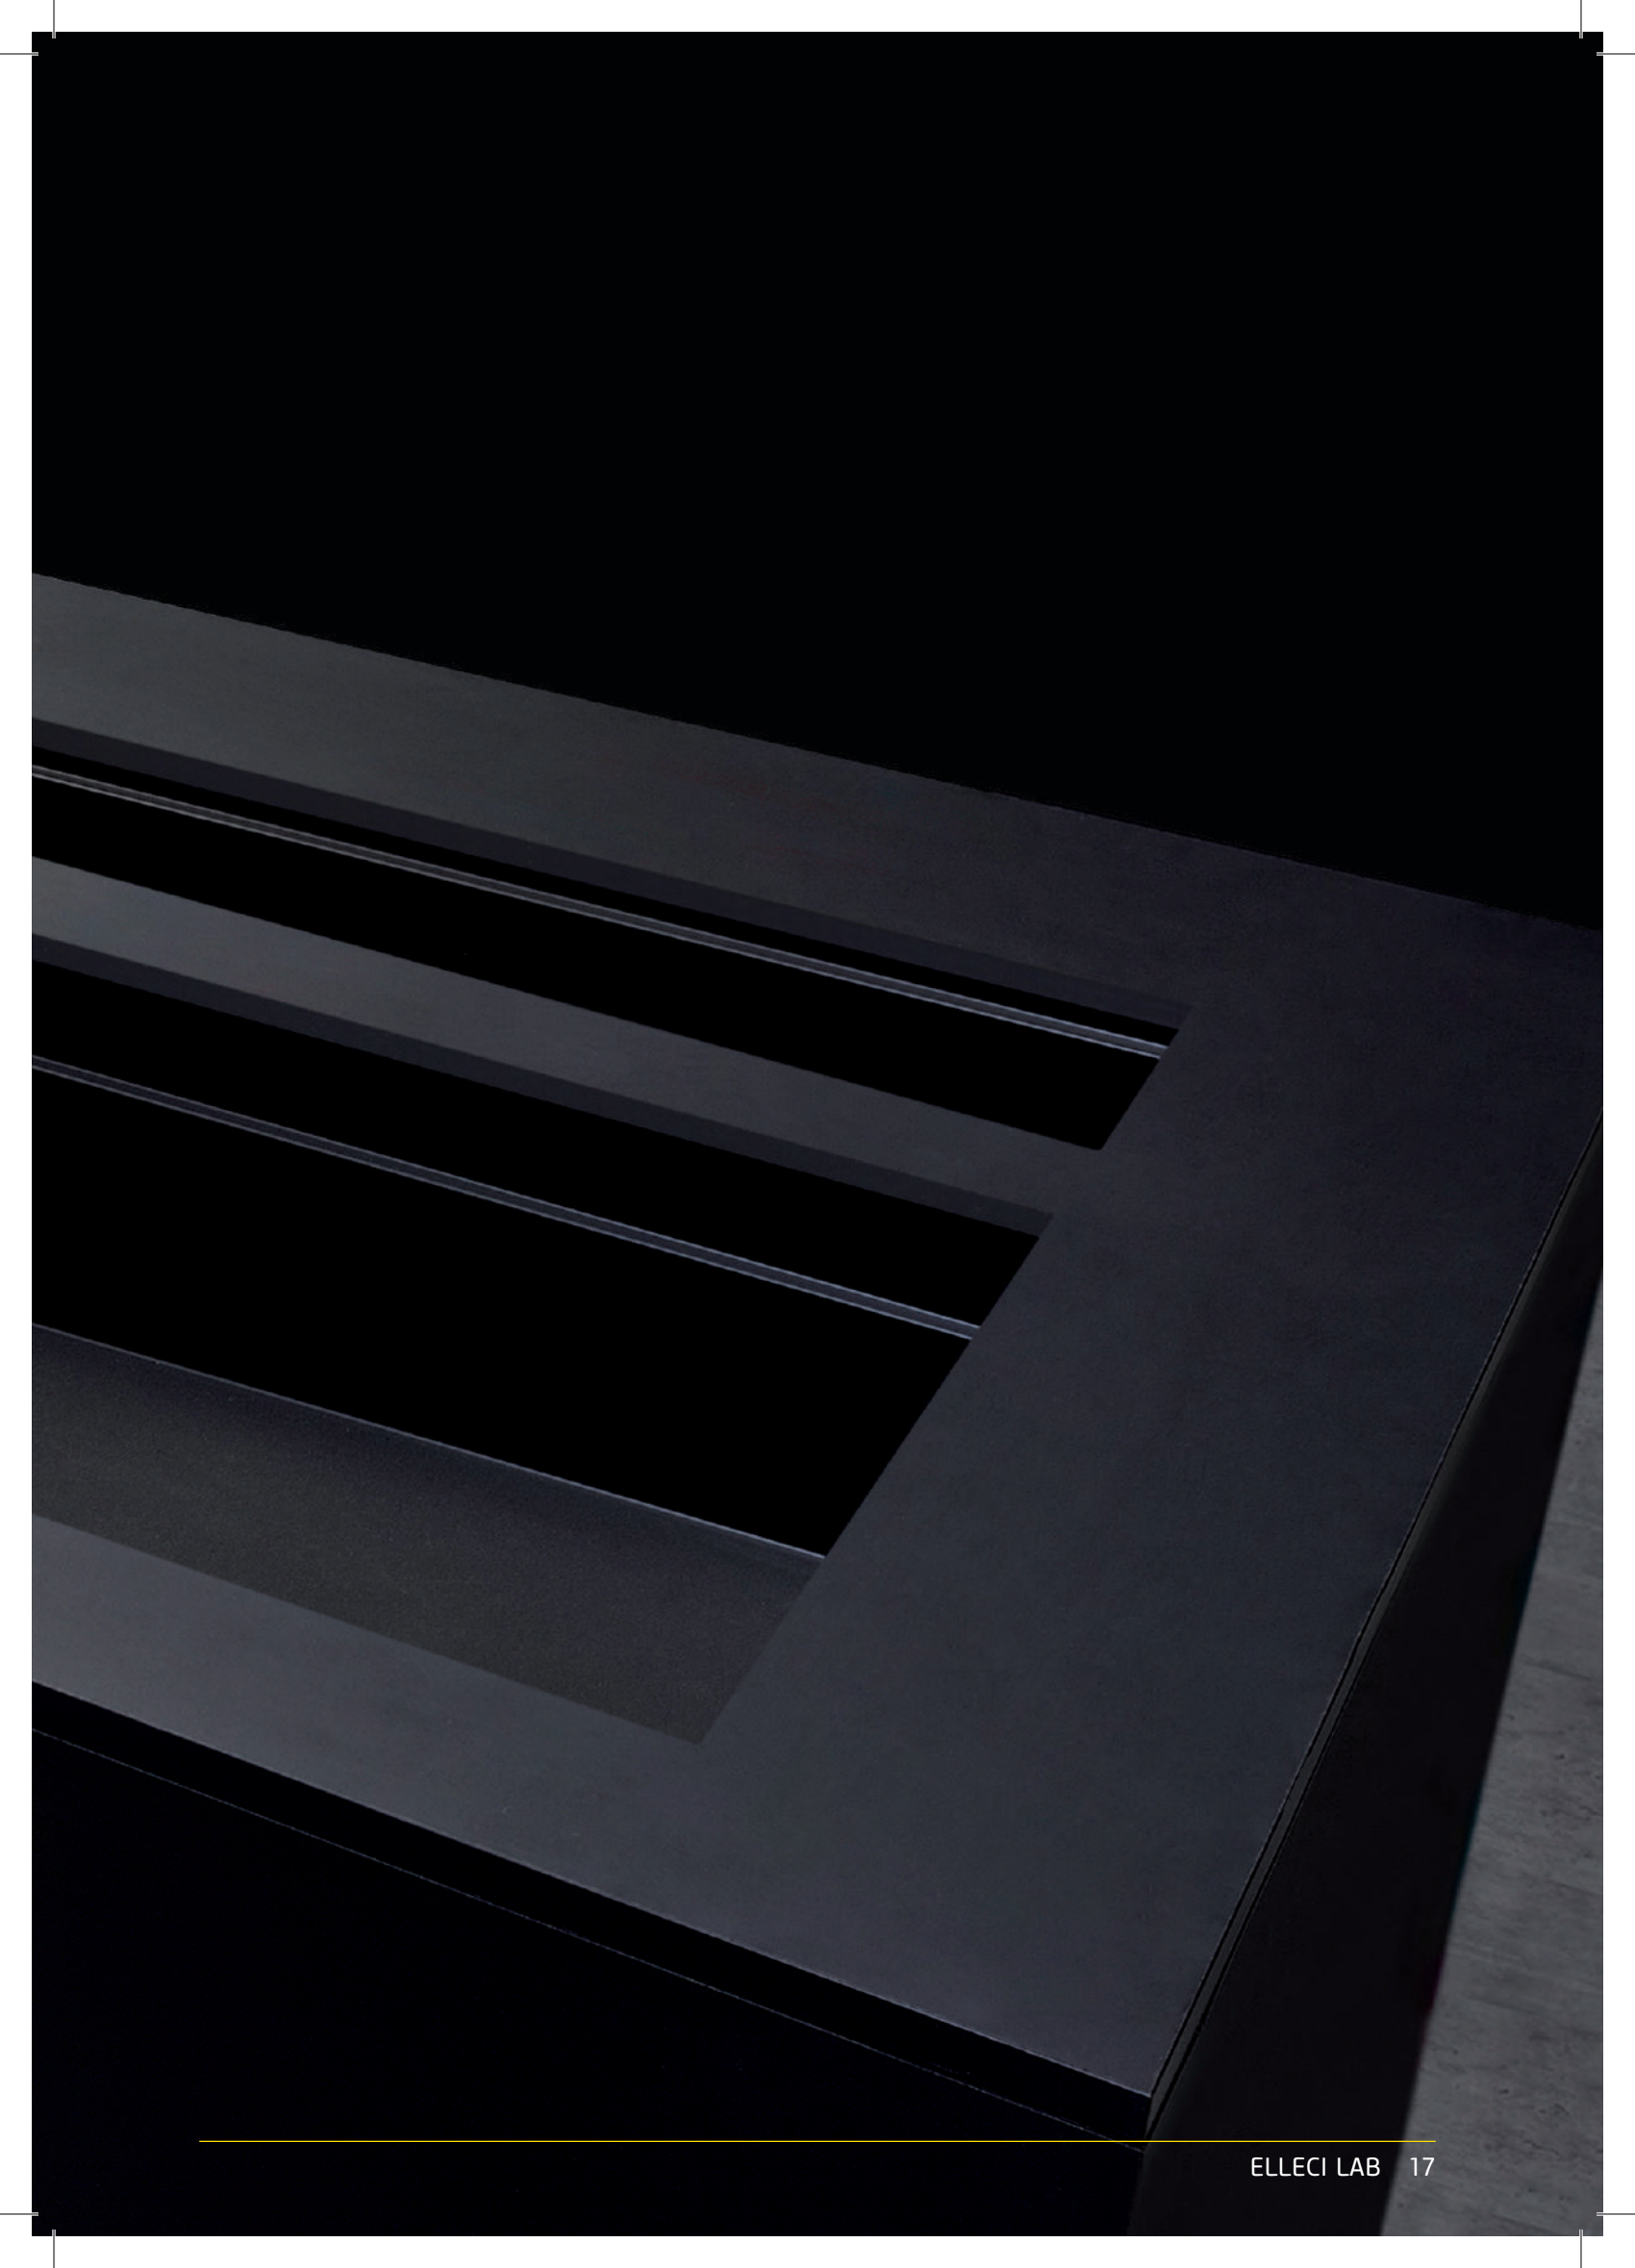

Equipped Track

Accessories

Dialogo 360 Workstation and Dialogo C86 Equipped Track
could be installed also in undermount version

■ 03

The accessories slide along the internal edge of the sink to always be in a perfect position; the unedited cover, made of the same sink material, hides the drain and gives continuity to the spacious extra-large bowl with an increased inclination floor. A feature that, together with the rectangular overflow and the lateral area for installing mixers and accessories, underlines the incredibly innovative character of DIALOGO.

220 mm bowl depth

Materic cover in Black K86 and hidden waste

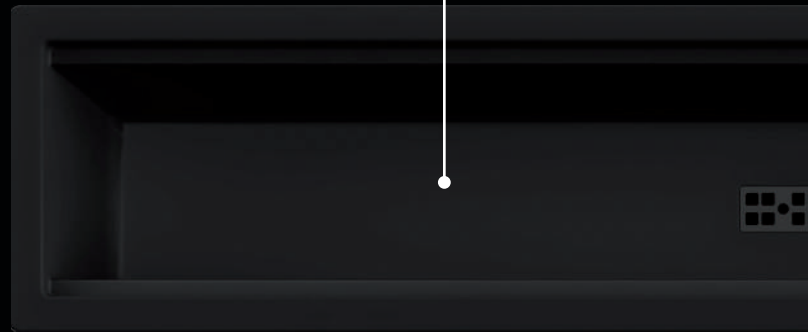

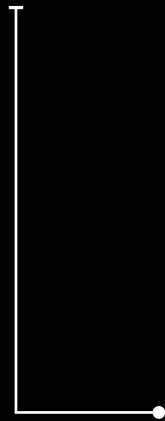

■ 04

Do not just think about a sink - think bigger. With DIALOGO Equipped Track, ideas and possibilities of use are expanded; it is installed behind the Workstation and becomes its ideal complement. As in the Workstation, the accessories slide along the internal edge and can be positioned alternately on both spaces. It will be so easy to take a kit from the Equipped Track, place it on the Workstation and at the end put it back in its original position.

150 mm bowl depth

■ 05

No matter what you plan to do: with the numerous Element accessories your imagination has no limits. The accessories have been specially designed to have everything at hand. Thus, through their modularity, real dialogue is established between all the elements of the kitchen, optimizing the movements of the body, and maximizing efficiency and ease of use.

ACCESSORIES

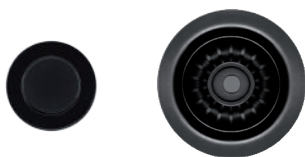

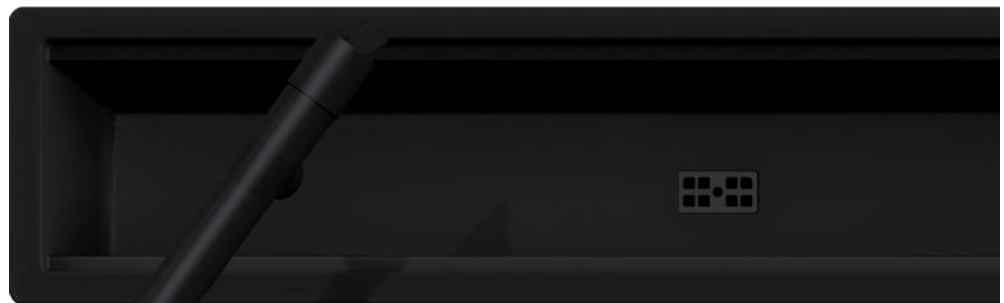

Element Kit 2 Cutting Boards in Aluminium Black Matt
Element Tray in Aluminium Black Matt
Element Colander Dialogo in Polypropylene Black Matt

ACCESSORIES DETAILS

The workstation has the appropriate space for the accessories you want to insert. Whether it is colander, dish drainer, rollmat, cutting boards, multifunction trays, there is always a solution that makes life in the kitchen easier. The accessories are designed to be placed on the workstation and to slide along the professional edge.

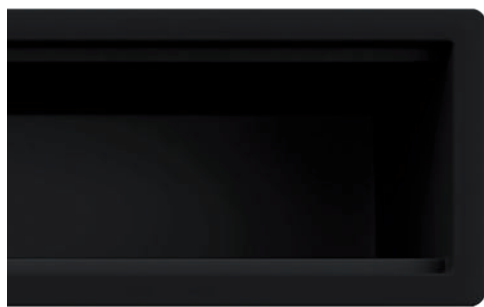

ELEMENT HALF TRAY

**ELEMENT POP-UP
PUSH CONTROL**

By completing the modular program with the installation of the equipped track, the accessories that are not used on the workstation can be positioned right in the channel, making the available space more organized.

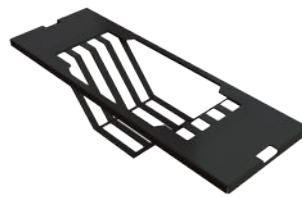

ELEMENT TRAY

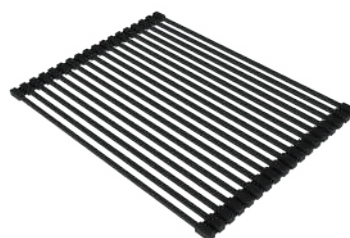

**ELEMENT COLANDER
DIALOGO**

ELEMENT DRAINER

**ELEMENT KIT 2
CUTTING BOARDS**

ELEMENT ROLLMAT 440

ELEMENT COLANDER DIALOGO

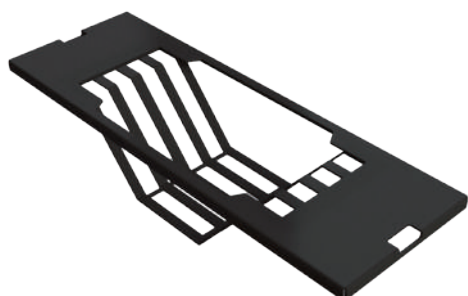

Element Colander Dialogo, made of polypropylene, is a container with small holes in it, used for washing food or for emptying food into when it has been cooked in water.

ELEMENT TRAY & HALF TRAY

Element Tray is an aluminium multitasking base that can accommodate glasses, small vases, cutlery, utensils, also acting as a drip tray. Like all Dialogo accessories, Element Tray can be placed both in the Workstation and in the Equipped Track. Element Half Tray has the same functions in half-space and is exclusively dedicated to Dialogo C86 Equipped Track.

ELEMENT DRAINER

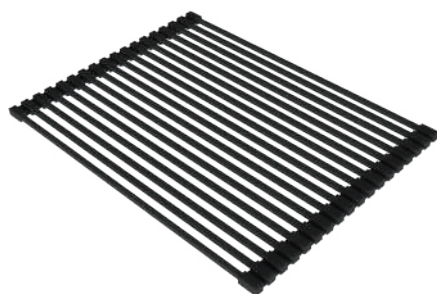

Element Drainer is the practical aluminium dish drainer where you can carefully place and dry dishes in a simple and effective way.

ELEMENT KIT 2 CUTTING BOARDS

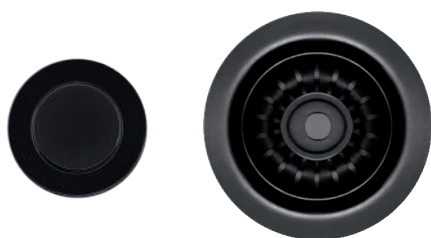

Element Kit 2 Cutting Boards is an aluminium structure with two cutting boards supplied (an HPL cutting board for bread and a polypropylene cutting board).

ELEMENT ROLLMAT 440

Element Rollmat is very useful for draining glasses and dishes and can also be used as a trivet to protect the work surface from hot pots and pans. Element Rollmat is made externally in alimentary silicon and with metal ribs inside, and after use, it can be rolled up and stored easily.

ELEMENT POP-UP PUSH CONTROL

Element Pop-Up Push Control allows the opening and closing of the drain with a simple push action. It can be easily installed in the special dedicated lateral area, in one of the 4 rear preholes.

COLOUR AS AN ELEMENT OF STYLE

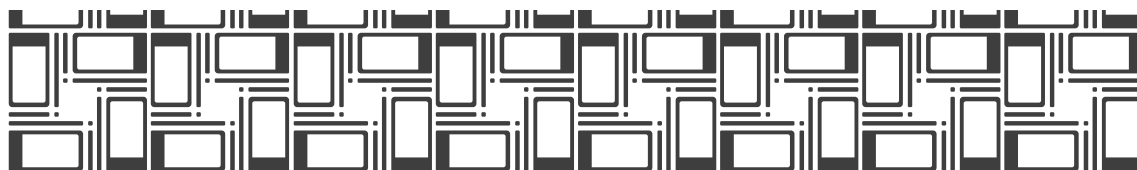

For many just a detail, for Elleci Lab an added value.

Each colour tells a different emotion, reveals a new personality and dresses an innovative sink in an exclusive way.

The key colours, K86 Black, K96 White and K97 Light Gray delicately interpret the concepts of harmony and functionality in skilful balance.

The trendy colours, K83 Clay and K81 Night Green exceed the imagination, embodying a bold spirit that surprises for its elegance.

Keratek Plus is the innovative Elleci patented material, suitable for contact with food, which allows combining performance and aesthetics.

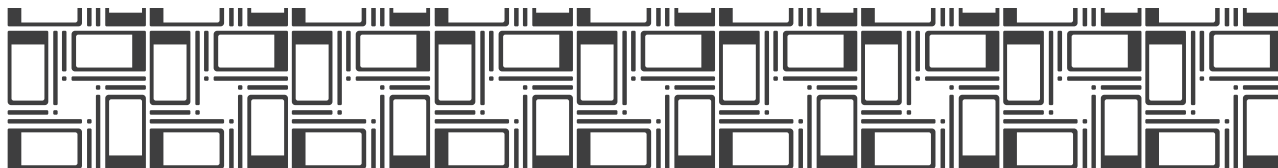

With Keratek Plus, colours come alive: 100% high definition for an incredible visual experience, with colours that never fade. Complete aesthetic integration between sink, working top and kitchen.

Its special formulation based on a blend of acrylic resins and ceramic nanoparticles makes its surface of the bowl extremely smooth, easy to clean and particularly resistant to thermal shocks and shocks.

Zen Limited Edition brings a touch of class and style into the kitchen, thanks to the design combining bowls in trendy colours with details such as the rectangular overflow and the Black Matt drain. The two models, Zen 130 and Zen 105, meet the most popular needs for essentiality and functionality.

CARE AND MAINTENANCE

Maintaining the aesthetics and functionality of the bowl over time is extremely simple. Just clean the bowl daily with water, dish detergent and a soft cloth, without letting deposits and residues act for a long time on the surfaces.

1.

Remove any stains deriving from daily use, using a normal dish detergent, diluting it with warm water and cleaning the surfaces with a soft cloth or sponge, making small circular movements.

2.

Rinse the surfaces thoroughly with warm water.

3.

Carefully dry the wet parts with a microfibre cloth to prevent the formation of limestone stains.

4.

To prevent the formation of limestone stains on the bowl, it is also recommended to decalcify the bowl once or twice a week, using a descaling detergent.

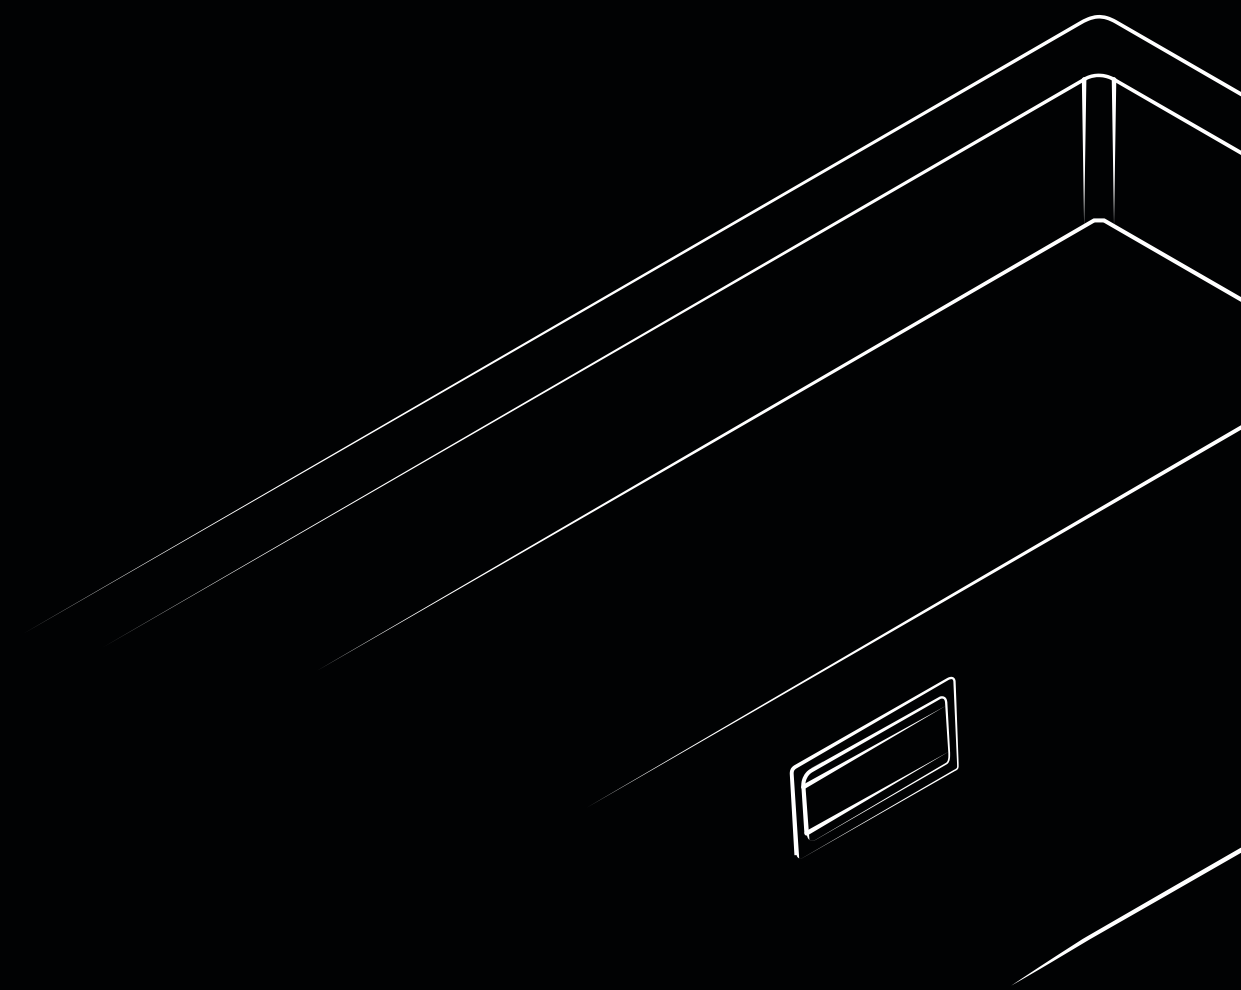

ADDITIONAL WARNINGS AND ADVICES

Do not use aggressive detergents, disgorging products, highly alkaline substances such as ammonia or caustic soda, or abrasive products.

Do not place pots, pans or coffee pots that have just been removed from the heat directly on the bowl.

Do not cut food directly on the bowl but using cutting boards.

Do not pour boiling oil, the drains may be deformed.

TEST	REFERENCE NORMATIVE	RESULT
Heat resistance (180° C)	UNI EN13310	Compliant, ★★★★★ / 5 ²⁾
Thermal shock with hot water 90° / cold water 15°	UNI EN13310	Compliant, over 1000 cycles
Impact resistance	UNI EN ISO 179	Compliant, 5,04 mJ/mm ²
Abrasion	UNI EN13310	Compliant, 0,02%
Resistance to chemical and staining agents ¹⁾	UNI EN13310	Compliant, ★★★★★ / 5 ²⁾
Water smoothness	UNI EN13310	Compliant
Load stability	UNI EN13310	Compliant
Durability ³⁾	UNI EN13310	Compliant, ★★★★★ / 5 ²⁾

¹⁾ Resistance tests to chemical and staining agents are carried out according to the UNI reference standard EN13310. The used substances are placed on the bowl and left to deposit for 24 hours, after which the cleanability test is performed. These results could differ in daily practice, if the deposits are allowed to act for more than 24 hours.

²⁾ ★★★★★ = maximum obtainable result

³⁾ The reference standard UNI EN13310 considers the bowl to be durable if complying with all the standards tests listed above.
